## **Mini Project Report**

**SDM COLLEGE (Autonomous)**

**Ujire – 574240**

### **EXPENSE TRACKER SYSTEM**

**By**

**ABHISHEK U S**

**Roll No :211301**

**Under the guidance of**

**Ms. Rakshitha H J**

**Assistant Professor,**

**Department of B.voc in Software and Application Development**

---

**SRI DHARMASTHALA MANJUNATHESWARA COLLEGE  
(AUTONOMOUS)**

**Ujire – 574240**

**Department of Software and Application Development**

**Certificate for the approval of project report**

This is to certify that Abhishek U S, 211301 of II B.voc has satisfactorily completed the Android App project “Expense Tracker System” for the B.voc in Software and Application Development Degree Prescribed by the college during the academic year 2022 – 2023.

Mr. Sammed Jain

Ms. Rakshitha H J

Dr Kumara Hegde B A

**Head of the Department**

**Project Guide**

**Principal**

Examiners:

- 1.
- 2.

## **DECLARATION**

I hereby declare that this Android App project work entitled “Expense Tracker System” has been prepared by me during the year 2022 – 2023 under the guidance of Ms. Rakshitha H J, Department of B.voc in Software and Application Development, SDM College in the partial fulfillment of B.voc degree prescribed by the college.

I also declare that this project is the outcome of My own effort, that it has not been submitted to any other university for the award of any degree.

Abhishek U S,

211301

## **ACKNOWLEDGEMENT**

I would like to thank our principal Dr. Kumara Hegde B A, for his support. We also thank Mr. Sammed Jain HOD, Dept. of B.voc in Software and Application Development, SDM College Ujire, for his valuable suggestions.

I would like to thank Ms. Rakshitha H J, Department of B.voc in Software and Application Development, SDM College Ujire, for their help and for providing guidance in developing the project.

Abhishek U S

# Chapter 1

## Introduction

The app has 1 module namely customer or client.

**Expense Tracking:** The app allows users to record their expenses in real-time, making it easy to log every transaction. Users can categorize expenses by type, such as food, transportation, entertainment, etc. They can also add additional details like the date, time, and location of the expense.

**Budget Management:** The Expense Tracker System enables users to set monthly or weekly budgets for different expense categories. The app provides visual representations, such as charts and graphs, to track their progress and determine if they are sticking to their budget.

**Income Tracking:** Users can also track their income alongside expenses, giving them a comprehensive overview of their financial situation. The app supports multiple income sources, allowing users to add details such as salary, investments, and other sources of income.

The Expense Tracker System is a powerful Android app designed to simplify expense management and improve financial awareness

## Chapter 2

### Requirement Specification

Requirement specification is a specification of software requirements and hardware requirements required to do the project. Requirement analysis encompasses those tasks that go into determining the needs or conditions to meet for a new or altered product or project, taking account of the possibly conflicting requirements of the various stakeholders, analyzing, documenting, validating and managing software or system requirements.

#### 2.1 Hardware Requirements

Sl. No.	Hardware/Equipment	Specification
1	Processor	Intel(R) Core (TM)-i5 Processor
2	Clock Speed	2.30 GHz
3	Monitor	1024*768 Resolution, color
4	RAM	8GB (min.)

#### 2.2 Software Requirements

Sl. No.	Software	Specification
1	Operating System	Windows 11 Home Single Language
2	Scripting	Java, XML
3	Tools Used	Android Studio, Firebase
4	Web Browser	Google Chrome

## **Chapter 3**

### **Implementation**

Implementation is a process of development of an application. Once the system design is completed then actual development of system will starts. The development of application using system design is called the implementation phase. In this phase, largest system is divided into small modules. For each module, algorithms are developed and each algorithm is coded using programming languages.

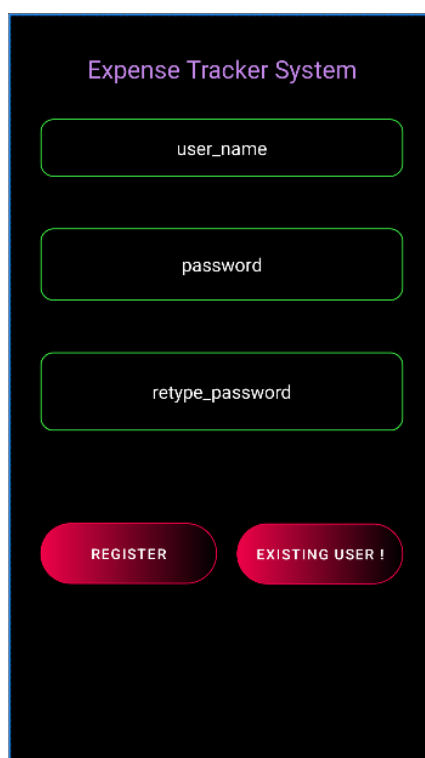

## Chapter 4

### Results

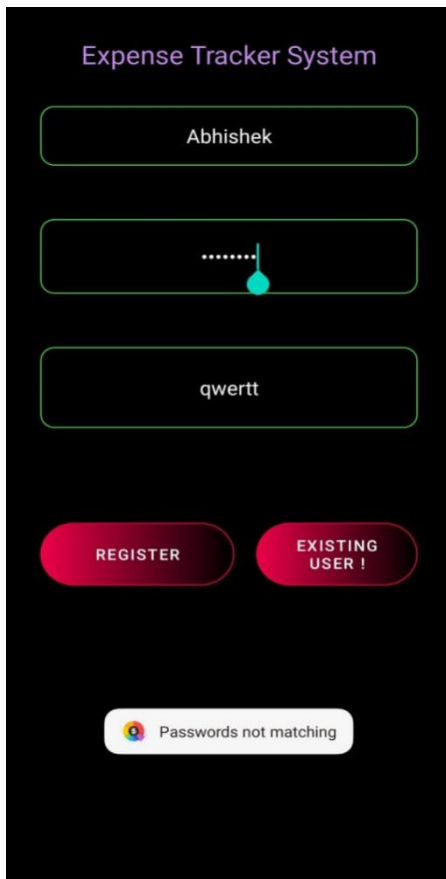

Results basically refer to any particular output that comes as a result of the completion of the activities that have been performed as part of the project or a particular project component.

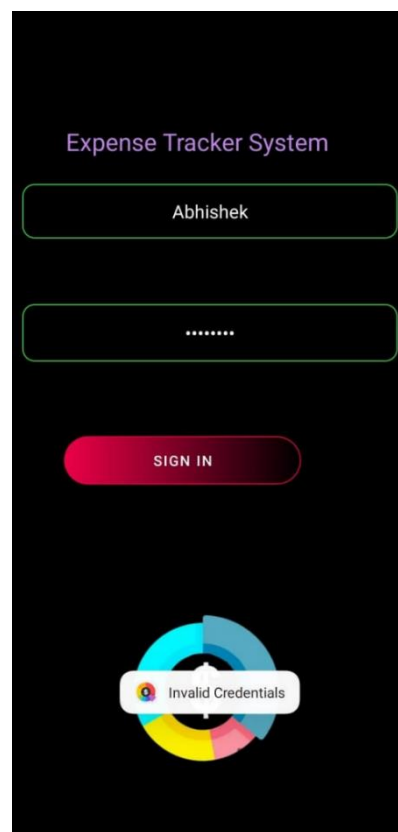

**Figure 4.1:** This is how the Splash Screen looks like.

The image shows a registration form for the "Expense Tracker System". It has a dark blue background. At the top, the text "Expense Tracker System" is written in a light blue font. Below this, there are three input fields with rounded corners and a light blue border. The first field is labeled "user\_name", the second is labeled "password", and the third is labeled "retype\_password". At the bottom of the form, there are two red buttons with rounded corners. The left button is labeled "REGISTER" and the right button is labeled "EXISTING USER !".

**Figure 4.2:** Here the User can Register to the app using their respective user name and Password.

**Figure 4.3:** This page the password have to match to the reentered password

**Figure 4.4 and 4.5:** This is the Sign Portal where user can enter his password and user name to Sign In

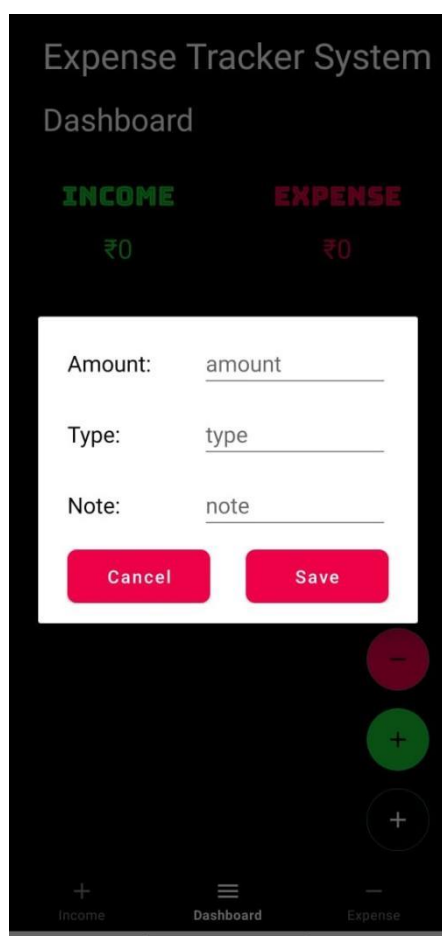

**Figure 4.6** This is the dashboard page showing signin successful

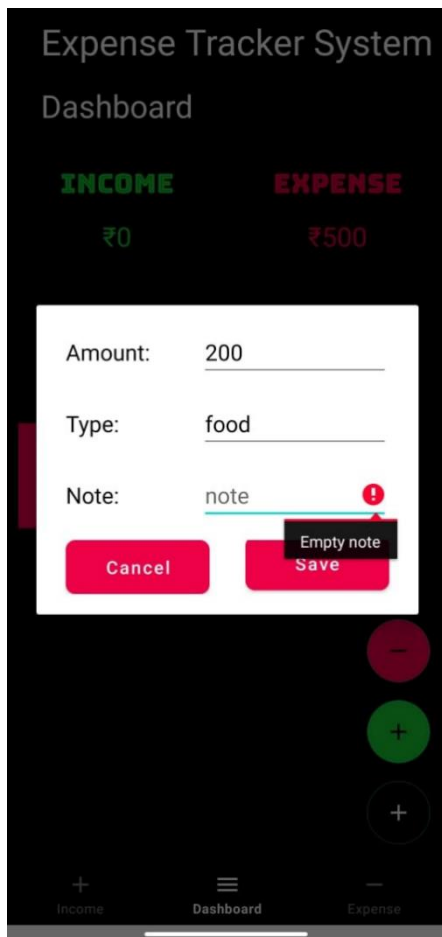

**Figure 4.7:** This page have both details on Income and Expense

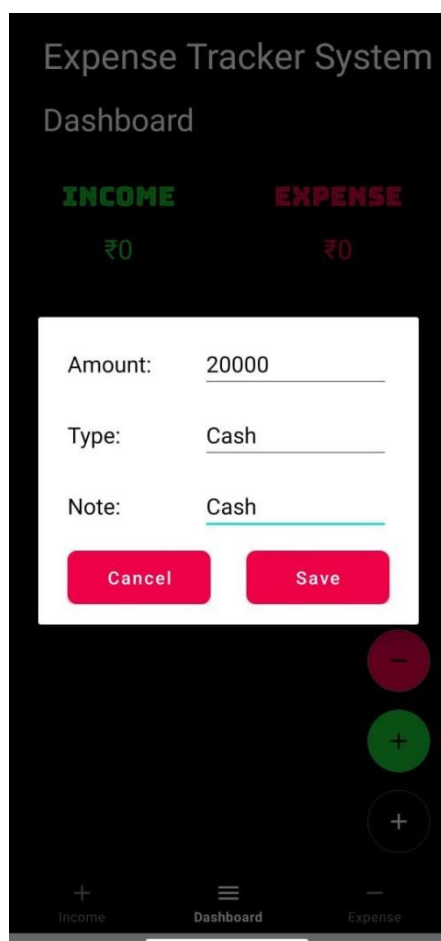

**Figure 4.8:** This page have both details on Income and Expense

**Figure 4.9:** This page is the where the income and expense details have to enter.

**Figure 4.10:** In pages are the where the income and expense details have to enter and have to enter full details.

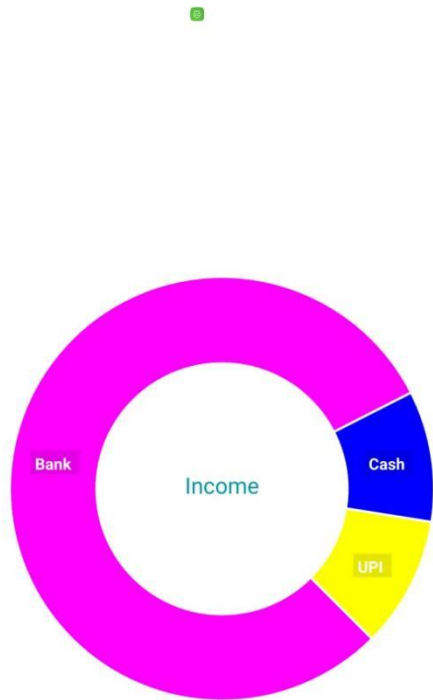

**Figure 4.11:** In the page income details are entered

**Figure 4.12:** In the page income details are stored

**Figure 4.13:** In the page income details

**Figure 4.14:** In the page income details in chart

**Figure 4.15:** In the page Expense details are stored

                else{
                    Boolean checkuserpass = DB.checkusernamepassword(user, pass);
                    if(checkuserpass==true){
                        Toast.makeText(LoginActivity.this, "Sign in successfull",
Toast.LENGTH_SHORT).show();
                        Intent intent = new Intent(getApplicationContext(), MainActivity.class);
                        startActivity(intent);
                    }else{
                        Toast.makeText(LoginActivity.this, "Invalid Credentials",
Toast.LENGTH_SHORT).show();
                    }
                }
            }
        });
    }
}

```

## **Chapter 6**

### **Conclusion and Scope for Future Work**

The Expense Tracker System is a powerful Android app designed to simplify expense management and improve financial awareness. With its intuitive interface, robust features, and data analysis capabilities, users can take control of their finances, make informed decisions, and achieve their financial goals. Whether you're an individual trying to save money or a business professional tracking expenses for reimbursement, this app can serve as your trusted financial companion.

### **FUTURE ENHANCEMENT**

There is still additional room for future upgradation that would improve quality of the app and make it more useful and user friendly. Some of the features that can be enhanced are:

- To add the profile section for user and bank details.
- To link the bank account to the app for easy entry
- To ensure users never miss a payment, the app includes a bill reminder feature.
- To beautify the app by improving the UI design.
